Feedback to GH academy:

Shoutout to the mentors for creating a trusting and encouraging space to ask questions. They respond in a coaching manner that helps me to see same thing with different lens.

It has been meaningful to revisit foundational topics I first learned in 2022, now from the perspective of experienced engineers who explain things in their own unique ways. Even though I am familiar with tools like terminal and bash, I still watch every pre-recorded session and take notes.

Things I will Focus on Next Week

- ☐ GitHub Activity
- ☐ Catch up on recordings
- ☐ Catch up on home works
- ☐ Journal Every Day
- ☐ Attend Meetings
